Instrument Set-up

Introduction

⚠️ The safety instructions and the user manual should be read through carefully before the product is used for the first time.

🔥 The person responsible for the product must ensure that all users understand these directions and adhere to them.

The symbols used have the following meanings:

⚠️ WARNING
Indicates a potentially hazardous situation or an unintended use which, if not avoided, will result in death or serious injury.

⚠️ CAUTION
Indicates a potentially hazardous situation or an unintended use which, if not avoided, may result in minor injury and/or appreciable material, financial and environmental damage.

🔍 Important paragraphs which must be adhered to in practice as they enable the product to be used in a technically correct and efficient manner.

Overview
**Instrument Set-up**

**Display**

- Battery
- Area / Volume
- Measuring reference
- Info
- Min/Max Measuring
- Addition / Subtraction
- Units
- Main line
- Pythagoras

**Insert batteries**

To ensure a reliable use, do not use zinc-carbon batteries. Change batteries when battery symbol is flashing.
**Operations**

**Switching ON/OFF**
- **OFF CLEAR**
  - 2 sec
  - Device is turned OFF.

**Clear**
- **OFF CLEAR**
  - 1x
  - Undo last action.

**Message Codes**
- If the info icon appears with a number, observe the instructions in section "Message Codes". Example:

**Adjusting measuring reference**
1. Distance is measured from the front of the device.
2. Distance is measured from the rear of the device (standard setting).

**Distance unit setting**
- Switch between the following units:
  - 0.000m 0'00" 1/16
  - 0 in 1/16
**Measuring Functions**

**Measuring single distance**

1. Aim active laser at target.
2. The last value measured is displayed.

**Permanent measuring**

1. Aim active laser at target.
2. The last value measured is displayed.

**Add / Subtract**

1. The next measurement is added to the previous one.
2. The next measurement is subtracted from the previous one.
3. The result is shown in the main line and the measured value above. This process can be repeated as required. The same process can be used for adding or subtracting areas or volumes.
### Measuring Functions

#### Area

1. **1x**
   - Aim laser at first target point.

2. **2x**
   - Aim laser at second target point.

3. The result is shown in the main line and the measured value above.

   - **24.352 m²**

#### Volume

1. **1x**
   - Aim laser at first target point.

2. **2x**
   - Aim laser at second target point.

3. **3x**
   - Aim laser at third target point.

4. The result is shown in the main line and the measured value above.

   - **78.694 m³**

---

geo-FENNEL EcoDist Pro®
Measuring Functions
Pythagoras (2-point)

1. Aim laser at upper point.
2. Aim laser rectangular at lower point.
3. Pressing the measuring key for 2 sec in the function activates automatically Minimum or Maximum measurement.

Pythagoras (3-point)

1. Aim laser at upper point.
2. Aim laser at rectangular point.
3. Aim laser at lower point.
4. The result is shown in the main line and the measured distance above.
5. Pressing the measuring key for 2 sec in the function activates automatically Minimum or Maximum measurement.
Technical Data

* applies for 100 % target reflectivity (white painted wall), low background illumination, 25 °C
** applies for 10 to 500 % target reflectivity, high background illumination, 0 °C to + 40 °C
*** Tolerances apply from 0.05 m to 10 m with a confidence level of 95%. The maximum tolerance may deteriorate to 0.15 mm/m between 10 m to 30 m and to 0.2 mm/m for distances above 30 m
**** applies for 100 % target reflectivity, background illumination of approximately 30'000 lux
Message Codes

If the message Error does not disappear after switching on the device repeatedly, contact the dealer.
If the message InFo appears with a number, press the Clear button and observe the following instructions:

Care

- Clean the device with a damp, soft cloth.
- Never immerse the device in water.
- Never use aggressive cleaning agents or solvents.

Safety Instructions

The person responsible for the instrument must ensure that all users understand these directions and adhere to them.

Areas of responsibility

Responsibilities of the manufacturer of the original equipment:
geo-FENNEL GmbH
D-34225 Baunatal
(short geo-FENNEL)

The company above is responsible for supplying the product, including the User Manual in a completely safe condition.
The company above is not responsible for third party accessories.

Responsibilities of the person in charge of the instrument:

- To understand the safety instructions on the product and the instructions in the User Manual.
- To be familiar with local safety regulations relating to accident prevention.
- Always prevent access to the product by unauthorised personnel.
Safety Instructions

Permitted use
- Measuring distances
- Tilt measurement

Prohibited use
- Using the product without instruction
- Using outside the stated limits
- Deactivation of safety systems and removal of explanatory and hazard labels
- Opening of the equipment by using tools (screwdrivers, etc.)
- Carrying out modification or conversion of the product
- Use of accessories from other manufacturers without express approval
- Deliberate dazzling of third parties; also in the dark
- Inadequate safeguards at the surveying site (e.g. when measuring on roads, construction sites, etc.)
- Deliberate or irresponsible behaviour on scaffolding, when using ladders, when measuring near machines which are running or near parts of machines or installations which are unprotected
- Aiming directly in the sun

Hazards in use

⚠️ WARNING
Watch out for erroneous measurements if the instrument is defective or if it has been dropped or has been misused or modified. Carry out periodic test measurements. Particularly after the instrument has been subject to abnormal use, and before, during and after important measurements.

⚠️ CAUTION
Never attempt to repair the product yourself. In case of damage, contact a local dealer.

⚠️ WARNING
Changes or modifications not expressly approved could void the user’s authority to operate the equipment.

Limits of use
- Refer to section "Technical data".
  - The device is designed for use in areas permanently habitable by humans. Do not use the product in explosion hazardous areas or in aggressive environments.

Disposal

⚠️ CAUTION
Flat batteries must not be disposed of with household waste. Care for the environment and take them to the collection points provided in accordance with national or local regulations.

The product must not be disposed with household waste.

Dispose of the product appropriately in accordance with the national regulations in force in your country.

Adhere to the national and country specific regulations.

Product specific treatment and waste management can be downloaded from our homepage.

Electromagnetic Compatibility (EMC)

⚠️ WARNING
The device conforms to the most stringent requirements of the relevant standards and regulations. Yet, the possibility of causing interference in other devices cannot be totally excluded.
Safety Instructions

FCC statement (applicable in U.S.)
This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
• Reorient or relocate the receiving antenna.
• Increase the separation between the equipment and receiver.
• Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
• Consult the dealer or an experienced radio/TV technician for help.

Laser classification
The device produces visible laser beams, which are emitted from the instrument: It is a Class 2 laser product in accordance with:
• IEC60825-1 : 2007 „Radiation safety of laser products”

Laser Class 2 products:
Do not stare into the laser beam or direct it towards other people unnecessarily. Eye protection is normally afforded by aversion responses including the blink reflex.

⚠️ WARNING
Looking directly into the beam with optical aids (e.g. binoculars, telescopes) can be hazardous.

⚠️ CAUTION
Looking into the laser beam may be hazardous to the eyes.

Labelling
Subject to change (drawings, descriptions and technical data) without prior notice.
